1. **Attach the Strap**

   - Thread the strap through the strap guides.

2. **Charge the Battery**

   - A completely exhausted battery will charge in about 90 minutes.

3. **Insert the Battery**

   - Insert the battery as shown.

4. **Attach a Lens**

   - To attach the lens, position the lens mounting index on the camera body, position the lens in the camera’s bayonet mount and rotate the lens in the direction shown until it clicks into place.

5. **Choose a Language and Set the Clock**

   - A language selector dialog box will be displayed the first time the camera is turned on. Follow the steps below to choose a language and set the clock. No photographs can be shot before the clock has been set.

6. **Insert a Memory Card**

   - The camera records photographs on Secure Digital (SD) memory cards (available separately). See page 208 of the User’s Manual for details.

7. **Format the Memory Card**

   - Memory cards must be formatted in the D60 before first use. Note that formatting memory cards permanently deletes all photographs and other data they may contain. Be sure to check that all data you wish to keep have been copied to another storage device before formatting the card. Turn the camera off before removing the memory card from the camera.

8. **Focus the Viewfinder (Dioptr Adjustment)**

   - Slide the diopter adjustment control up or down until the focus points are in sharp focus. When operating the diopter adjustment control with your eye to the viewfinder, be careful not to put your fingers or fingernails in your eye.

9. **View the Results**

   - Images are automatically displayed after shooting. If no photograph is displayed in the monitor, the most recent photograph can be viewed by pressing the multi selector. Additional photographs can be displayed by rotating the command dial or pressing the multi selector to the right or left. To view highlights or additional photograph information about the current photograph, press the multi selector up or down. See page 37 of this User’s Manual for details.

10. **Delete Unwanted Photographs**

    - To delete the photograph currently displayed in the monitor, press the multi selector down. A confirmation dialog will be displayed. Press [ ] again to delete the image and return to playback. To exit without deleting the photograph, press [ ].

11. **Taking Photographs**

    - Before taking photographs, be sure to check that the memory card slot cover is closed and the memory card access lamp is off.

12. **Viewing Photographs on TV**

    - With a TV and the D60 connected, you can view photographs on the TV screen. For more information on using the TV, see page 232 of the User’s Manual.
Installing Software (Windows)

The illustrations in this section are intended as a guide only. The dialog and messages displayed during installation may differ in some respects from those shown here.

1. Start the computer and insert the installer CD. Insert the Software Suite CD in the CD-ROM drive and double-click the Welcome icon (if the Welcome icon is not displayed, double-click the CD icon on the desktop). Enter an administrator name and password when prompted and click OK. A language-selection dialog will be displayed.

2. Choose a language. To install the Software Suite in the language currently displayed, click Next. If the desired language is not available, click Region Selection to choose a different region and then choose the desired language (the Region Selection button is not available in the European release of the Software Suite). The Software Suite installer dialog will be displayed.

3. Click Nikon Standard Install. Follow the on-screen instructions to install Nikon Transfer and ViewNX.

Other installation options

Custom Install:
- Install selected software.
- Link to Nikon: Download trial versions of Nikon software or visit Nikon technical support websites (Internet connection required).

Install Guide:
- View online help for installing and using the Software Suite.

4. Exit the installer. The message shown below will be displayed when installation is complete. Click OK to close the Software Suite installer dialog. If a dialog is displayed directing you to restart the computer, follow the on-screen instructions.

5. Remove the installer CD from the CD-ROM drive.

Installing the Software Suite (Macintosh)

The illustrations in this section are intended as a guide only. The dialog and messages displayed during installation may differ in some respects from those shown here.

1. Start the computer and install the installer CD. Insert the Software Suite CD in the CD-ROM drive and double-click the Welcome icon (if the Welcome icon is not displayed, double-click the CD icon on the desktop). Enter an administrator name and password when prompted and click OK. A language-selection dialog will be displayed.

2. Choose a language. To install the Software Suite in the language currently displayed, click Next. If the desired language is not available, click Region Selection to choose a different region and then choose the desired language (the Region Selection button is not available in the European release of the Software Suite). The Software Suite installer dialog will be displayed.

3. Click Nikon Standard Install. Follow the on-screen instructions to install Nikon Transfer and ViewNX.

Other installation options

Custom Install:
- Install selected software.
- Link to Nikon: Download trial versions of Nikon software or visit Nikon technical support websites (Internet connection required).

Install Guide:
- View online help for installing and using the Software Suite.

4. Exit the installer. The message shown below will be displayed when installation is complete. Click OK to close the Software Suite installer dialog. If a dialog is displayed directing you to restart the computer, follow the on-screen instructions.

5. Remove the installer CD from the CD-ROM drive.

Installing Software

The supported Software Suite CD contains Nikon Transfer and ViewNX software. Nikon Transfer is used to copy (transfer) pictures from the camera to the computer, and ViewNX to view pictures after transfer. Before connecting the camera, be sure that the Software Suite is installed.

Software Suite System Requirements*

Windows:
- Microsoft® Windows® XP SP 3 or later
- Microsoft® Windows® Vista® SP 1 or later
- Microsoft® Windows® 7
- Windows® 8.1 (8.1 Pro recommended)
- 32-bit or 64-bit processor
- 2 GB RAM
- 256 MB free disk space (1 GB recommended)
- DirectX 9.0c (or later)
- CD-ROM drive
- DVD drive
- Internet connection

Macintosh:
- Macintosh OS X 10.5.8 or later
- 64-bit processor
- 2 GB RAM
- 2 GB disk space (4 GB recommended)
- DVD drive

* Refer to the Nikon website for the latest information on operating system compatibility.

Before installing the Software Suite

- Turn off any virus protection software and not all applications before beginning installation.
- Log in as an account with administrator privileges when installing or uninstalling the Software Suite.

Before Installing the Software Suite

• Read the Nikon Transfer and ViewNX End User License Agreements. Before installing the Software Suite, read the Nikon Transfer and ViewNX End User License Agreement.

Installing the Software Suite in the Language Currently Displayed

1. Start the computer and insert the installer CD. Insert the Software Suite CD in the CD-ROM drive and double-click the Welcome icon (if the Welcome icon is not displayed, double-click the CD icon on the desktop). Enter an administrator name and password when prompted and click OK. A language-selection dialog will be displayed.

2. Choose a language. To install the Software Suite in the language currently displayed, click Next. If the desired language is not available, click Region Selection to choose a different region and then choose the desired language (the Region Selection button is not available in the European release of the Software Suite). The Software Suite installer dialog will be displayed.

3. Click Nikon Standard Install. Follow the on-screen instructions to install Nikon Transfer and ViewNX.

Other installation options

Custom Install:
- Install selected software.
- Link to Nikon: Download trial versions of Nikon software or visit Nikon technical support websites (Internet connection required).

Install Guide:
- View online help for installing and using the Software Suite.

4. Exit the installer. The message shown below will be displayed when installation is complete. Click OK to close the Software Suite installer dialog. If a dialog is displayed directing you to restart the computer, follow the on-screen instructions.

5. Remove the installer CD from the CD-ROM drive.

Printing Via Direct USB Connection

1. Turn the camera off.
2. Turn the printer on.
3. Connect the supplied UC-E4 USB cable as shown. Do not force or attempt to insert the connectors at an angle. Connect the camera directly to the printer; do not connect the cable via a USB hub or keyboard.
4. Connect the supplied USB-Cable UC-E4 as shown. Do not force or attempt to insert the connectors at an angle.
5. Press the multi selector left or right to view additional photographs, or press the shutter-release button to advance to the next photograph. To view six photographs at a time, press the multi selector up or down to highlight an option and press the multi selector left or right to select.
6. To print the picture currently selected in the PictBridge playback display, press OK. The menu shown at night will be displayed. Press the multi selector up or down to highlight an option and press the right selector to select.
