

Quick Start Guide to the Tascam DR-1 Digital Recorder

For standard quality MP3 stereo recording

(Link to full Manual: <http://oit.williams.edu/elc/ELC/DigitalAudMain/DR1.HTM>
Click "Read the Manual")

NOTE: Recharge battery by plugging USB cable into any working computer.

Hold Power button until
screen lights up.

Press Menu button
And use Selection wheel
to select
Rec Settings.
Press center of wheel to
enter Rec Settings

Use wheel to choose:

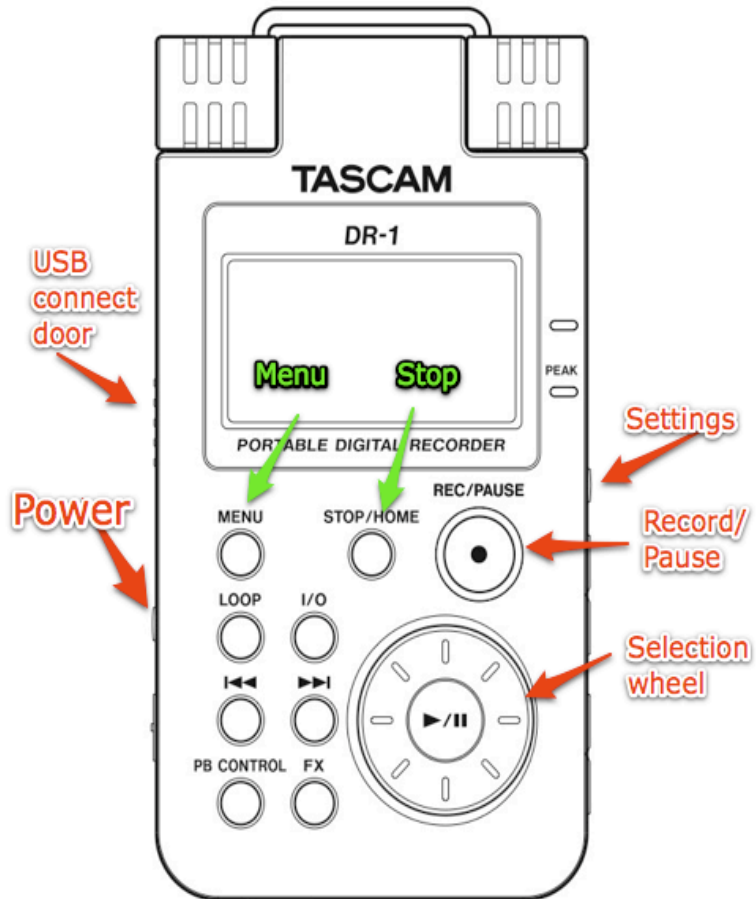

Format:MP3 128kbps

Sample: 44.1k

Size: 64M

Press Menu 2x to return
to regular screen

Check Input by pressing
Settings button (on side)
Input should be:
INT/MIC1

Press Settings to return to regular screen.

Rotate microphone directional bar as needed. You are now ready to record.

Press Record button once for standby mode (Button will flash)

Press Record again when ready to record (Button will stay on when recording)

Toggle between standby and record by pressing record button

When completely done, press STOP/HOME

Connect Tascam to computer using USB cable. Disk will mount on desktop and you can drag your MP3 file(s) off. NOTE: Save to a folder and import into other applications as needed from there.
